## Black Sluice I.D.B. Pumping Stations

### Dataset description

Black Sluice I.D.B. pumping stations is a spatial (point) dataset indicating the locations of pumping station assets owned and/or maintained by the Board.

The Board's pumping stations help to maintain the water levels in the network of watercourses within the Board's district for the purposes of land drainage and flood defence.

### Dataset licence and attribution

This dataset is licenced under the Open Government Licence:
